

Road to 10x: Accelerating Security Operations with GenAI

How GenAI is impacting cybersecurity

OFFENSE

AI is used for malicious purposes, including:

- AI-implemented cyberattacks
- Cyber fraud
- Disinformation campaigns

DEFENSE

AI is transforming SecOps, with:

- AI-powered threat hunting
- Dynamic incident response
- Security platform integration

GenAI is rapidly transforming security operations

AI-powered threat hunting

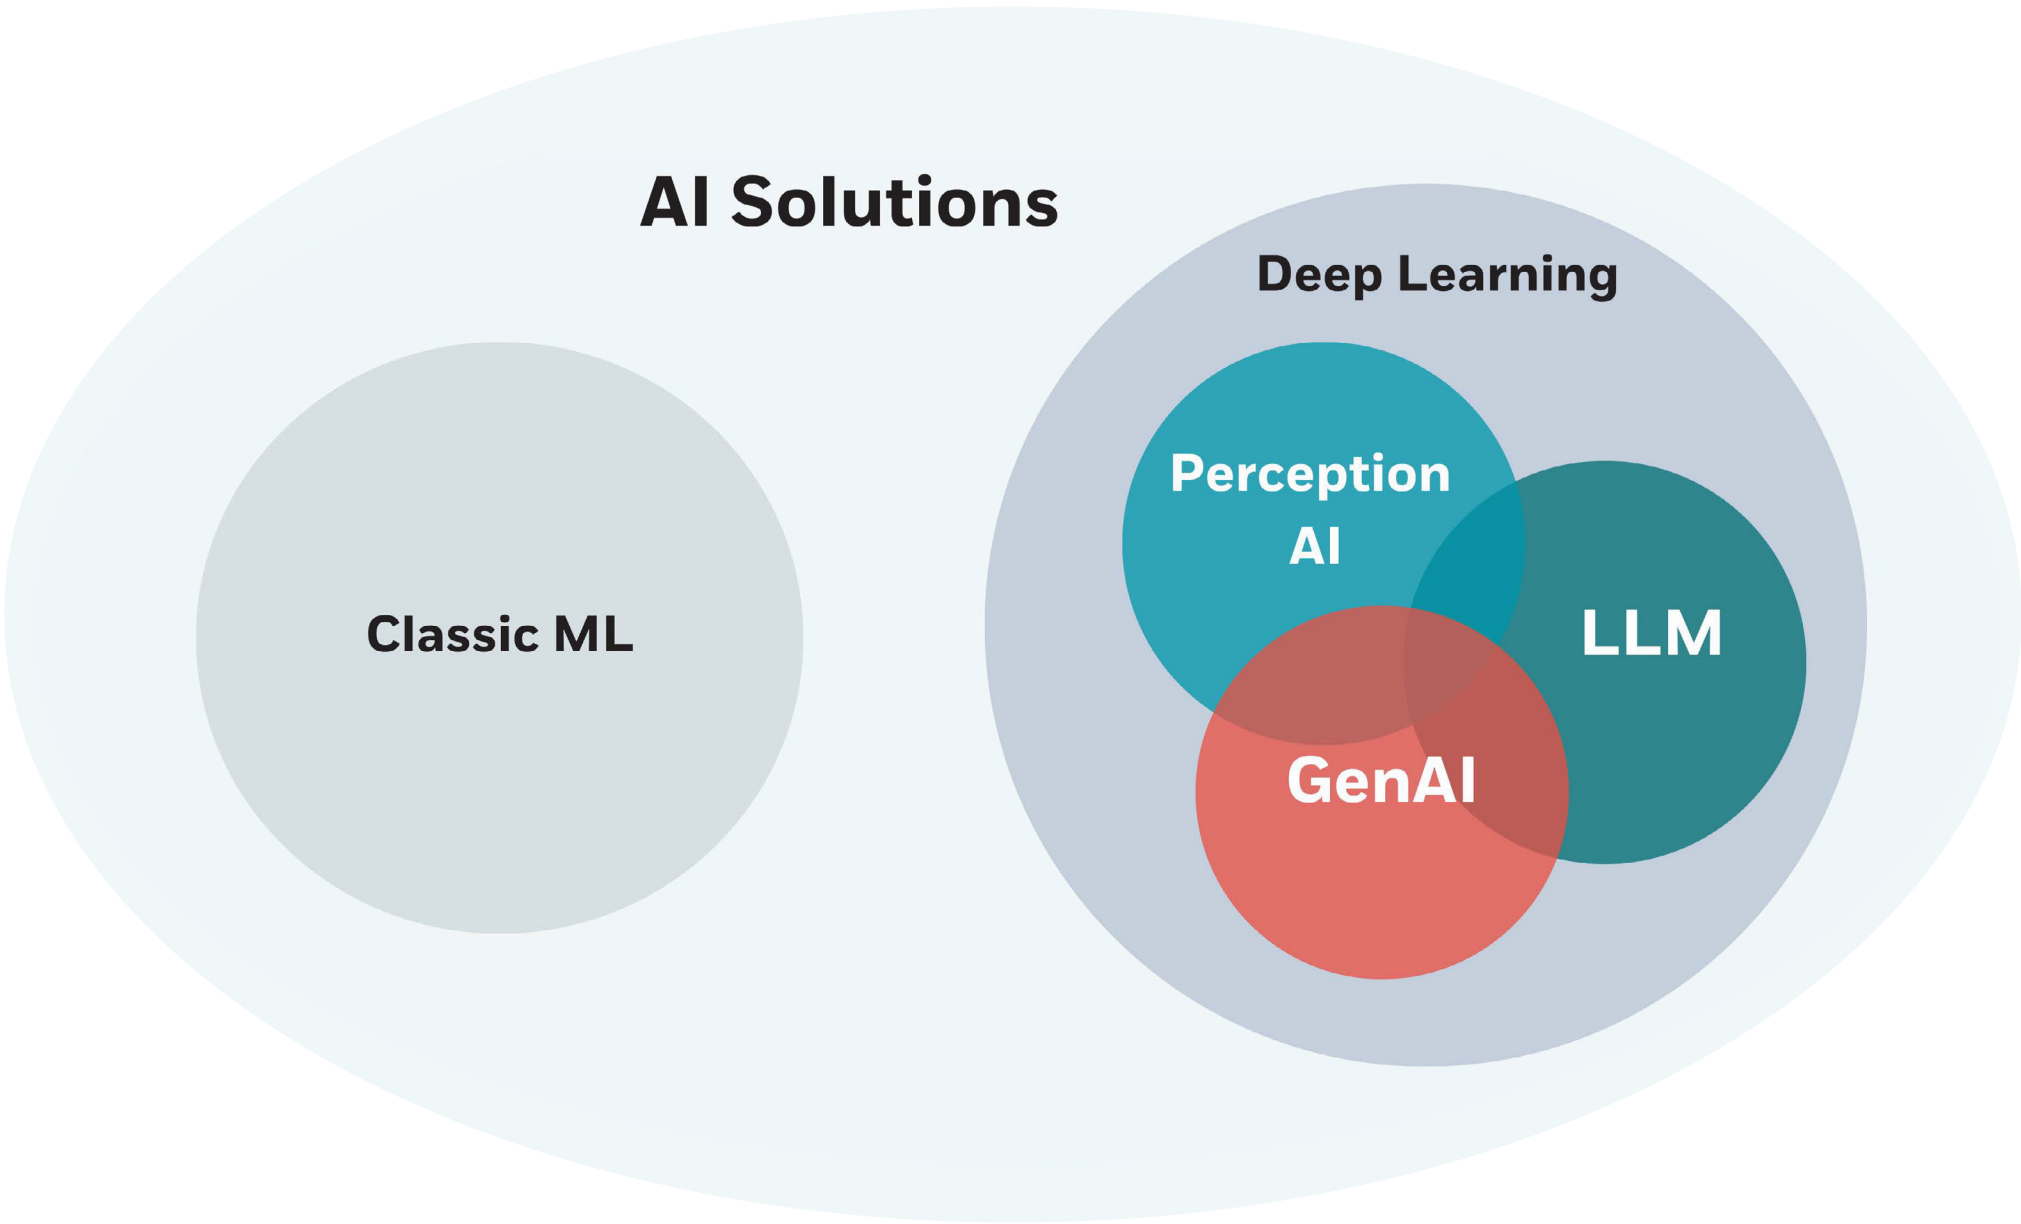

Dynamic incident response

Security platform integration

Super-charged threat hunting

RELATIONSHIP BETWEEN GENERATIVE AI AND OTHER AI SOLUTIONS

Dynamic Incident Response

Triage

Recommended actions

Red team/
blue team training

Security Platform Integration

Threat intelligence generation

Enhanced anomaly detection

Synthetic data generation

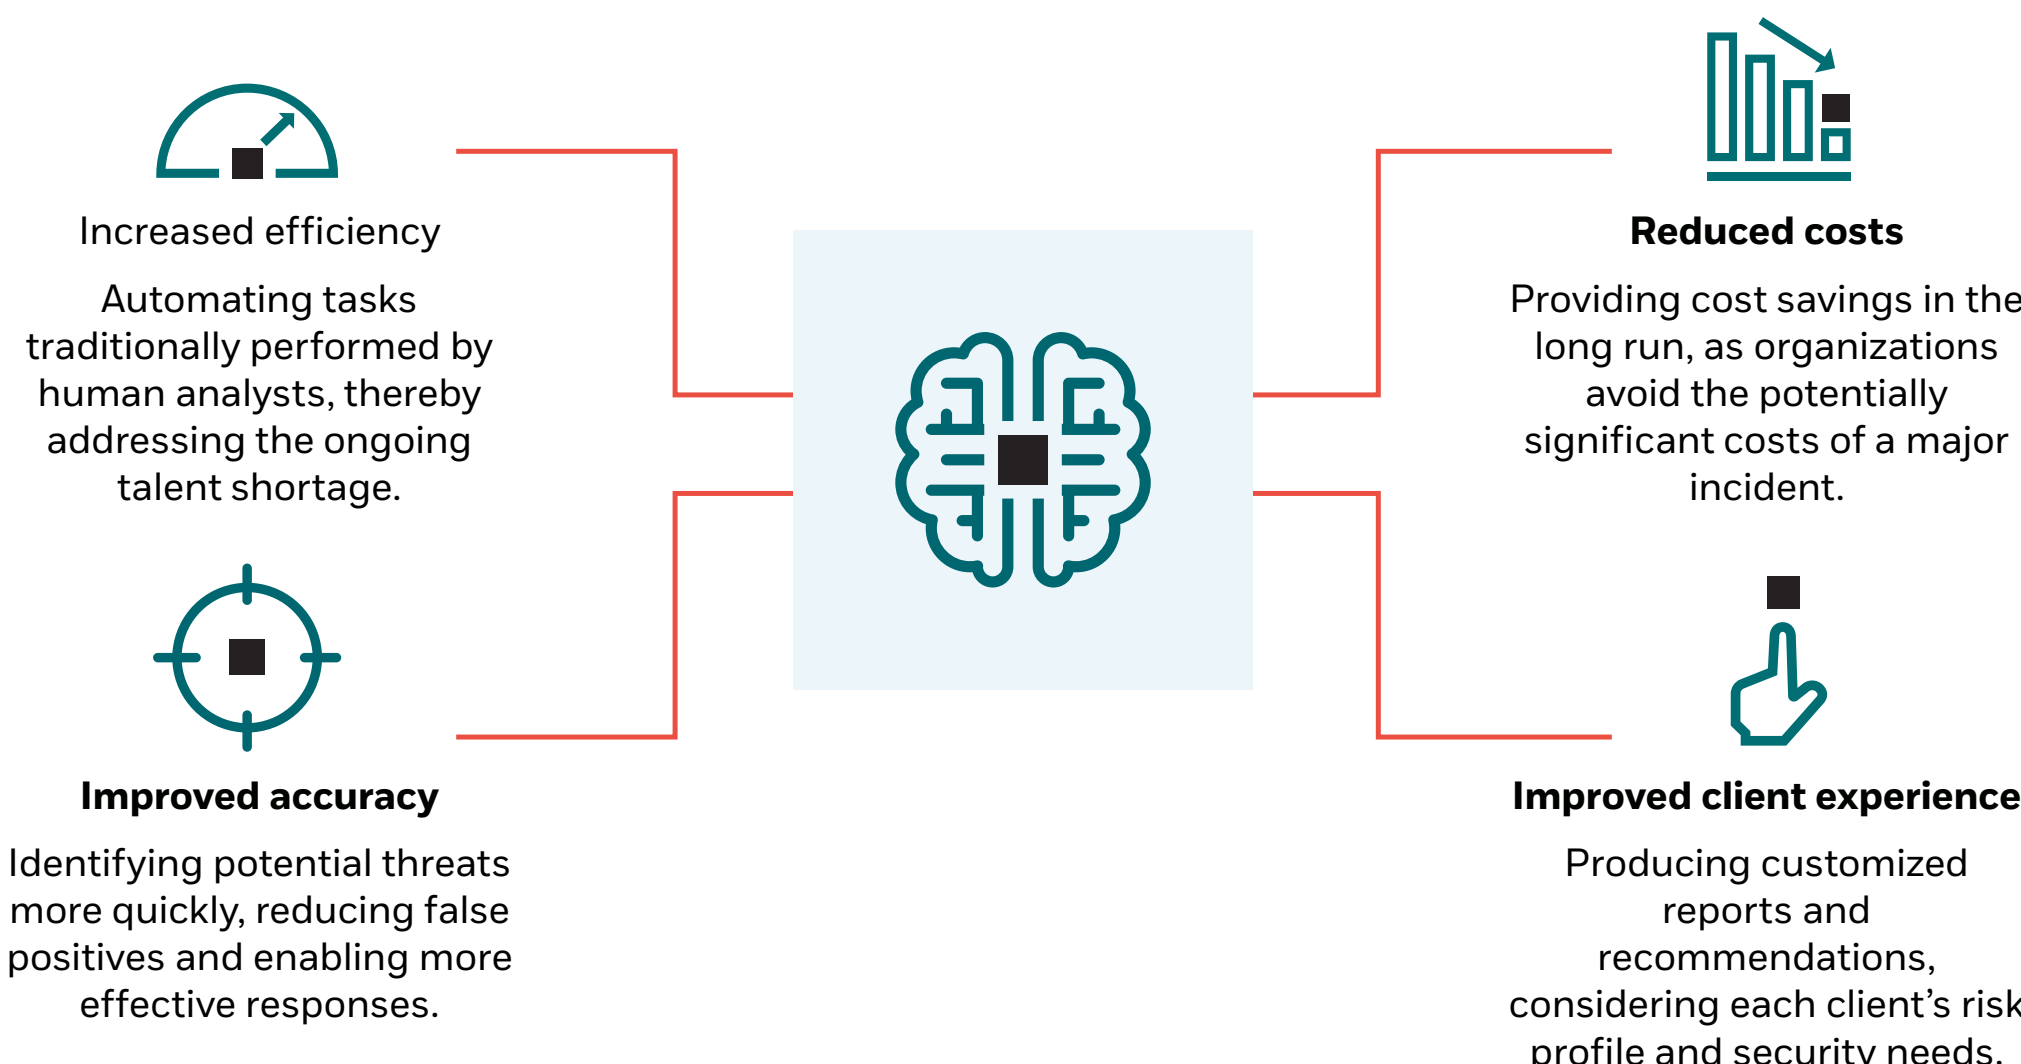

Automated security policy generation

Phishing training

How enterprises can benefit from GenAI
